- ✓ Fire Prevention & Protection
- ✓ Facility Management Services
- ✓ Canine Services
- ✓ Escape Rescue System
- ✓ Blast Effective Protection
- ✓ Security X-ray System
- ✓ Security Training Services
- ✓ Consultancy Services
- ✓ Drone Services

Guarding Services

Our security guards are handpicked for their abilities and work ethics. They are put through a rigorous training program at our well-equipped in-house training academy. The training encompasses a range of skills such as attending visitors and managing vendors, managing materials/stock flow, undertaking firefighting and evacuation drills, using hand-held metal detectors and performing first aid treatment. In addition, physical conditioning and drills are a regular feature. This results in highly trained security guards with a customer friendly disposition. Once deployed, regular refresher trainings are provided on a periodic basis to ensure that a high level of preparedness is maintained at all times.

With needs of every customer being different, we have developed the following specialization in our Guarding Services.

Guards

This field is diverse and we have several modules. Specialized training is imparted to guards who are deployed in shopping malls, hospitals, hotels, industries, schools and residential areas. Training differs in nature for such segment. However, all guards are trained in drills, discipline, frisking, observation, first aid, fire, electronic and other security equipments along with a host of other aspects so that they are well-equipped to deal with any eventuality. We have also a trained cadre of lady guards to fulfill the specific requirements of our clients.

Hotel Guards

With several years of experience in hotel industry, we have an in-depth understanding of the requirements of the Hospitality Industry. Drawing on this knowledge base, we have designed a special curriculum and the guards are trained to be courteous, well informed about the property besides catering to specific needs of the industry.

Bomb Detection and Search Techniques

A specialized faculty has been drawn from bomb detection squads of the Army and Paramilitary Forces and has been provided with the best training possible in bomb detection and search techniques.

Commercial Spaces

We have been training our security guards on high and corporate training. They go through the highest level of training before we deploy them .

Residential Areas

Specially trained security guards for residences are appropriately instructed to provide security at homes. Once deployed, these guards are fully dependable.

Personal Security Officers

These are veterans of Army and Paramilitary Forces who have been trained in closer quarter protection/close quarter battle. Selected for their experience, skills and discretion they protect high net worth individual(s)

Mall Guards

Specially trained protection in high footfalls such as large malls. All of our mall guards go through an intensive training process, which is based on the requirements of the mall and the surroundings and layout. Training in firefighting, first aid, handling of security equipments and other basics are part of their training.

Telecom Secure (Mobile Phone Towers)

These guards have been specially trained to safeguard this particular environment.

Hospital Security

Hospital Guards are trained to be vigilant, courteous, prompt and well versed in first aid and firefighting. They are well versed with the layout and facilities of the hospital before being deployed. Any patient walking in or being brought in an ambulance is immediately assisted and guided by a guard. The trainings makes our guards hospital guards/staff and not mere security guards.

School Security

Maintaining security of a school is an uphill task. One has to keep a vigil over hundreds of children. Our guards are well equipped to handle children and are trained in child psychology. They also have been trained to control traffic in an efficient manner.

SDPD-Secure Premise Diplomat Protection (Embassy)

This is an elite force drawn from the Army and Paramilitary Forces. These personnel have been in close quarter protection/ close quarter battle, trained in different environments and are suitably equipped for the assignment.

Security for Special Events

We also provide our guarding services for social events such as fashion shows, exhibitions, concerts, sports events etc.

Electronic Security Services

Our experts design, integrate, install and maintain a range of complex systems. We have tie ups with original equipment manufacturers across the globe and provide our services Pan India.

All these services are delivered using industry tested process and advanced technologies. An intensive training program is conducted wherein the candidates are taught the basics including instructions in the use of various housekeeping equipments and gadgets.

Housekeeping staff

An intensive training program is conducted wherein the candidates are taught the basics including use of various housekeeping equipment's and gadgets.

Escape Rescue System

The revolutionary system that was developed by ESCAPE rescue Systems Israel, after the 9/11 terrorist attacks, provides the only safe external mass evacuation system, which is fire proof and can be customized for bulletproofing as per customer requirements. We can supply and install systems in high-rise buildings to meet our customer requirements.

This system also provides an alternate route of Special Forces in a hostage situation. It has been designated as a Qualified Anti-Terrorism Technology (QATT) by the Department of Homeland Security (DHS), USA under the Safety Act. Further, it has been certified for safety by the German Laboratory TUV and the Standards Institute of Israel.

This system can also be used for regular logistical purposes such as lifting heavy furniture utilizing a multipurpose detachable cabin.

Standard System

This system consists of an array of collapsible fire resistant cabins that are stored permanently on the roof of the building up to 200m in height. In case of an emergency, the system can be operated using remote control from the ground. The entire evacuation cycle takes only eight minutes and rescues up to 150 persons.

Lite System

This system specifically designed for low-density floor building consists of two solid cabins in a nesting array configuration. It is also operated from the ground using a remote control and has been developed keeping in mind the same quality and performance parameters as the Standard System. Using the Lite System, up to 30 persons can be evacuated in each cycle.

Blast Effective Protection

This is a customized service offered by ANG Secure Pvt. Ltd. in the field of disaster management. It offers protection and mitigates the effects of the biggest threat from conventional terrorism today-Improvised Explosive Device (IED) and Vehicle borne IED (VIED) attacks, which are increasingly being used in terrorist attacks worldwide

Security X-Ray System

Gilardoni is a world leader in X-Ray and ultrasonic equipment, OEM components and services relating, medical and non - destructive testing sectors. ANG Secure Pvt. Ltd. is the head distributor of their systems in the Indian Market.

A wide range of X-Ray machines are available in varying sizes. We also have a range of mobile systems.
